Election/Restrictions

1. Applicant's election with traverse of claims 8-21 in the reply filed on November 17, 2008 is acknowledged. Upon further consideration, the previous restriction requirement has been withdrawn and replaced by restriction requirement below.

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to a method of making a plastic skin by powder sintering with a sintering tool that has a separating web and an inflatable sealing edge.

Group II, claim(s) 8-21, drawn to an apparatus for making a plastic skin by powder sintering with a sintering tool that has a separating web and an inflatable sealing edge.

Group III, claims 22-24, drawn to a plastic part comprising a plastic skin by powder sintering with a sintering tool that has a separating web and an inflatable sealing edge.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical feature which links the claims of Groups I and III is a sintering tool that has a separating web

and an inflatable sealing edge. Whether or not any particular technical feature makes a contribution over the prior art and therefore constitutes a "special technical feature" is considered with respect to novelty and inventive step. (MPEP [R-6] 1850 II.) As evidenced by Atsumi et al. (JP 2000-108148), the separating web (figure 1, between 36 and 38) and the inflatable sealing edge (figure 3:42) are known in the art. Therefore, the claimed technical feature fails to define a contribution over the prior art and unity of invention is lacking between these two groups.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
